

Scheme performance remains resilient despite COVID-19 impacts with ~30% volume growth year on year across the network.

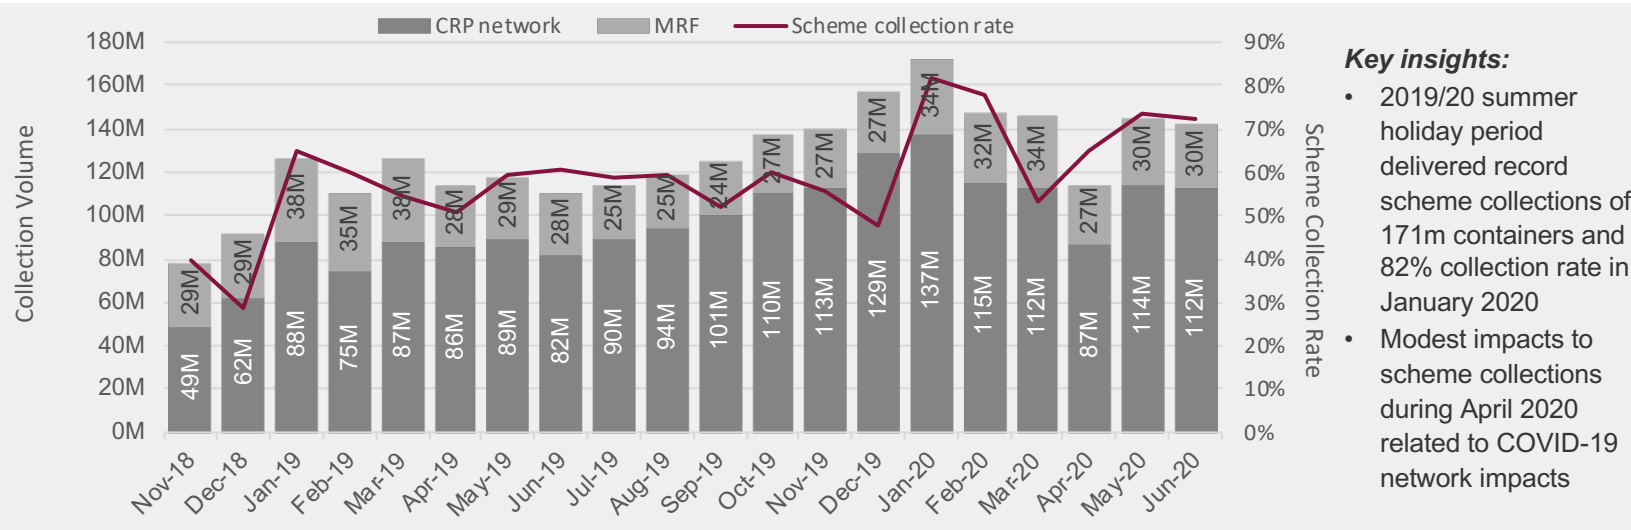

Container volumes

The *Containers for Change* scheme receives containers collected through the Container Refund Point (CRP) network and from those containers returned through council kerbside recycling which end up at Material Recovery Facilities (MRFs). Both avenues make up the overall scheme collection volumes and rate.

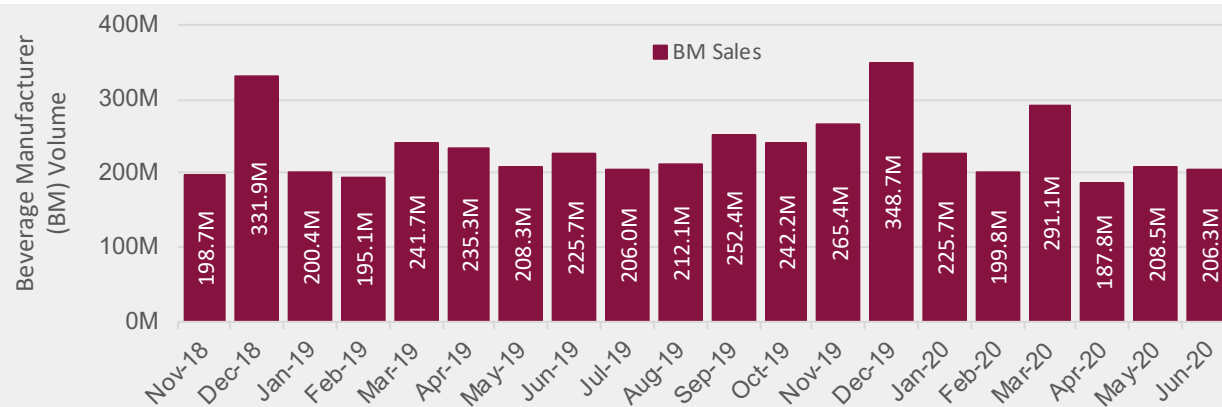

**March 2020 to June 2020 was during the COVID-19 pandemic.*

To note: January 2020 to June 2020 MRF volumes are forecast volumes, as MRF audits are quarterly in arrears.

Key insights:

- 2019/20 summer holiday period delivered record scheme collections of 171m containers and 82% collection rate in January 2020
- Modest impacts to scheme collections during April 2020 related to COVID-19 network impacts

Key insights:

- Almost 3 billion containers have been sold to Queensland consumers in the past 12 months
- December continues to be the higher month of Beverage Manufacturer (BM) sales

Container Refund Points (CRPs)

314 sites (including 19 suspended sites due to COVID-19)

Containers for Change have 295 operational CRPs and 19 temporarily suspended due to COVID-19 impacts as at 30 June 2020.

Scheme price

COEX has committed to providing a stable and efficient Container Refund Scheme (CRS) to Beverage Manufacturers. COEX has committed to maintaining the current scheme price until February 2021.

Material type	Cents per unit sold (ex. GST)	
	1 Nov 18 to 31 Oct 19	1 Nov 19 to current
Aluminium	9.9	11.2
Glass	10.5	11.9
HDPE	10.6	11.9
PET	10.3	11.9
LPB	10.6	12.1
Expected weighted average by number of containers sold	10.2	11.6
